My Dear Colleague,

RELAXAZUR is a psychiatric Post-Cure Facility. That is to say the encystment of the defenses that the Medical Team is confronted with in order to obtain some movement in our patients.

For more than 15 years we have used your compositions on five tapes, "Dynamic Evolutive Impulsion". These 30-minute sessions are offered to a small listening group and a possibility to write is offered to each participant. We were thus able not only to ascertain to what degree this sonorous basis would create the conditions favorable for an emotional re-living of often traumatic past experiences, but would also encourage the necessary associations for all psychotherapeutic work, a work that was taken up outside the relaxation and group and individual psychotherapeutic sessions.

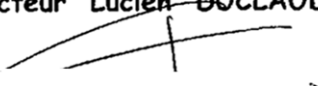

It seemed to us that the results were best with patients presenting a neurotic pattern, although it is also the case that the majority of pathologies received at Relaxazur follow that pattern.

We propose to extend this opportunity to a Post-Cure facility that focuses on psychotic pathologies and will certainly inform you as to the results.

We thank you for your help and I send you my most cordial and respectful greetings.

Doctor Lucien DUCLAUD

Docteur Lucien DUCLAUD.
